ILF Self-Propelled Machines

ASPEN

DEUTZ 143 HP · TIER 4F

PROFESSIONAL BRUSHCUTTER

- **Front mount boom** — the only one in the industry
- **Boom reach 19-30 ft** — working to 28 ft wide and 33 ft high
- Four-wheel drive, all-steering — 2-wheel, 4-wheel, and crab modes
- FOPS-ROPS certified cabin with SCD Stability Control

KOMMUNAL ★

DEUTZ 143 HP · TIER 4F

MULTIFUNCTION TOOL CARRIER

- **Front mount boom** — the only one in the industry; optional
- **Quick Attachment System** — attachments change in minutes
- Front and rear tool configurations run at the same time
- Boom, loader, bucket, sweeper, snow plow, blower, spreader

ALPHETTA

143 HP · SPEED-SHIFT

ROADSIDE GREEN MAINTENANCE

- **Boom reach 22 ft** — 28 ft working height
- Combined working telescopic arm and front tool
- Rotating, suspended panoramic cabin — 360° visibility
- 14 ft turning radius; 0-25 mph speed-shift gearbox

ALPHA EAGLE

JOHN DEERE 173 HP · TIER 4F

FORESTRY BOOM MOWER

- **Boom reach 33 ft** — telescopic boom
- 90° rotating FOPS-ROPS cabin for bidirectional work
- 10" ECI Energreen Control Interface display
- Front and rear attachment points; heavy-duty hydrostatic drive

5-Year ENERGREEN BOOM WARRANTY

Standard on every ILF machine · Factory-backed by Energreen

TELESCOPIC BOOM WORKING DISTANCE — ILF RANGE

18-49 ft

Longer reach is the ILF Athena — ask BEC about it

ROBOCOMPACT

25 HP

Smallest footprint — gates, trails, and tight easements.

ROBOEVO

40 HP

Remote-controlled carrier for slopes, ditches, and roadside banks.

ROBOMIDI

60 HP

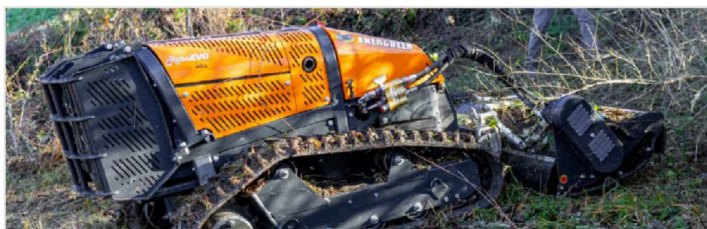

Multifunction carrier for slopes and utility corridors.

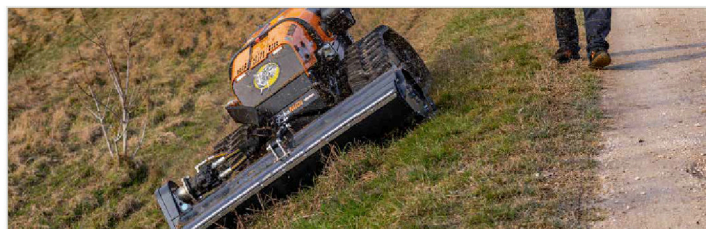

ROBOMAX

75 HP

Forestry mulching and stump grinding at production pace.

ATTACHMENT: Mulching head

ATTACHMENT: Mulching head

ROBOECO

Remote-Controlled Slope Mower

61°

MAX SLOPE

The operator never sets foot on the slope.

26 HP

HONDA IGXV800

40"

CUTTING WIDTH

4.4 MPH

BI-DIRECTIONAL

1,411 LB

DRY WEIGHT

492 FT

RADIO RANGE

- Deck height adjusts from the remote — high for dense brush, low for a clean finish
- Bi-directional cutting: the deck works going out and coming back, no repositioning
- Patented track tensioning and 8" all-terrain tracks for embankments and levees
- Cutting height 3/4"–4 3/4" · hydrostatic drive · automatic negative safety brakes

WHERE DEPARTMENTS PUT THEM TO WORK

- Right-of-way and roadside banks
- Levees, dams, and embankments
- Interchange and overpass slopes
- Ditch lines and drainage channels
- Trail and greenway maintenance
- Fence lines and utility corridors
- Stormwater detention basins
- Park grounds and open space
- Retention ponds and shorelines
